DETAILED ACTION

Response to After Final Amendment

1. The finality of the previous Office action has been withdrawn. Applicant's After Final Amendment filed on March 03, 2004 has been entered. A new office action is submitted herein.

Specification

2. The disclosure is objected to because of the following informality: please update the Cross Reference to Related Applications (i.e., now US 6,676,697). Appropriate correction is required.

Claim Objections

- 3. Claims 58 and 62 are objected to because of the following informalities:
- a. Regarding claim 58, line 6, please substitute "at the end" with --at an end--. Appropriate correction is required.
- **b.** Regarding claim 62, line 2, please add a comma (--,--) after "a proximal end". Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 86 and 88 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Regarding claim 86, line 2, the "distal end of the stent" renders the claim vague and indefinite. Examiner respectfully suggests to substitute "distal" with --proximal--. Appropriate correction is required.

b. Regarding claim 88, line 2, the "distal end of the stent" renders the claim vague and indefinite. Examiner respectfully suggests to substitute "distal" with --proximal--. Appropriate correction is required.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 58-71 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,676,697. Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claims 58-71 of the application and claims 1-4 of the patent lies in the

Art Unit: 3738

fact that the patent claims include many more elements and is thus much more specific. Thus the invention of claims 1-4 is in effect a "species" of the "generic" invention of claims 58-71. It has been held that the generic invention is "anticipated" by the "species". See *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims 58-71 are anticipated by claims 1-4 of the patent, it is not patentably distinct from claims 1-4.

However, in light of the Terminal Disclaimer filed on April 1st, 2004 (as the result of the phone interview of March 30, 2004), this double patenting rejection in now moot.

Allowable Subject Matter

8. Claims 58-63 and 65-88 are allowed.
